

Managing Projects

ESI International Professional Development Training sponsored by Hawaii Technology Development Venture

Learn How To:

- Master fundamental project management skills, concepts and techniques
- Link project goals and objectives to clear, compelling stakeholder needs
- Develop work breakdown structures
- Set realistic, measurable objectives and ensure positive results
- Estimate project costs and schedules using simple, proven techniques
- Establish a dependable project control and monitoring system

Get a solid understanding of project management methods with this comprehensive introductory course. Gain practical experience in proven project management techniques and discover a wealth of valuable, flexible tools that you can use immediately to ensure the success of any project in any type of organization.

Managing Projects gives you the foundation, techniques and tools to manage each stage of the project life cycle, work within organizational and cost constraints, set goals tied directly to stakeholder needs, get the most from your project management team, and utilize state-of-the-art project management tools to get the work done on time and within budget.

Covering the entire project life cycle, this course is built around best practices currently used in today's fast-paced business environment. The latest insights from the Project Management Institute's *A Guide to the Project Management Body of Knowledge (PMBOK® Guide)*, which incorporates information critical to project success, are also highlighted.
